Dylan Herndon is a water treatment specialist with Northwest Engineers, LLC. With a decade of experience, he is committed to the success and improvement of public health, the environment, and the community.

In 2018, Dylan was brought on board to bring the innovative Bullitt Center rainwater-to-potable water treatment system online and was subsequently featured on the cover of Engineering News-Record in July 2019. He maintains responsibility for Bullitt's drinking water system through his role with Northwest Engineers, while most recently assuming the position of Water Quality Analyst with the City of Redmond.

Dylan grew up in the heart of southern Virginia and began his career in 2014 with the City of Lynchburg as an operator for their two 12 MGD conventional surface water treatment plants.

He has spent the last several years assisting local communities, utilities, and tribes across western Washington to meet challenging drinking water needs through operational optimization efforts and treatment plant upgrades.

Dylan has numerous state certifications as a Water Treatment Plant Operator III, Water Distribution Manager III, and Cross-Connection Control Specialist, as well as a Low-Pressure Membrane Specialist. Dylan also is an active member of the American Waterworks Association, Western Washington Cross-Connection Prevention Professionals Group, and the Northwest Membrane Operators Association.
