Natascha Milesi Ferretti

Supervisory Research Engineer

National Institute of Standards and Technology

Phone: 301-975-6420

natascha.milesi-ferretti@nist.gov

Natascha Milesi Ferretti is a supervisory research engineer at the National Institute of Standards and Technology (NIST). She has extensive experience in designing, constructing and performing laboratory tests and works with both national and international stakeholders and standards development organizations.

Her current research seeks to address both energy and water-use efficiency in buildings by establishing the measurement science to better understand premise plumbing in buildings.

Milesi Ferretti is a co-creator of the HVAC-Cx software, which enables ongoing performance monitoring of heating, ventilating, and air conditioning equipment, and oversees testing at the NIST Plumbing Hydraulics Laboratory.
